

OUR ON BOARD UNIT. TRULY A MULTI-TALENT.

Our OBU brings the future onto the road.
The smart toll box offers everything you
need for your journeys across Europe.

Free-flow from Germany via Austria
to Italy. Technology independent toll
recognition thanks to newly integrated
DSRC module for CEN/ETSI and UNI Standard.

- Cross-border OBU with individually assignable EETS services per toll domain.
- Technology independent and reliable toll recognition for the entire Europe.
- Single invoicing across all toll contexts.
- Country-specific information can be inserted directly on the OBU.
- Possibility of adding functions, update of registration data and additional bookings of further toll areas or value-added services.
- Automatic country activation and software updates directly to the OBU wireless 'over the air'.
 - Easy exchange of OBUs within the transport fleet.
 - Self-installation of the windshield OBU by the driver in just a few minutes.
 - Power supply via the cigarette lighter or the in the vehicle provided three-wire cable.
 - Communication of OBU with the driver, in particular when using value-added services.
