

## A PARTNERSHIP WITH TOLL4EUROPE FOR THE FLOW ON EUROPE'S ROADS

Extend your service portfolio with Toll4Europe's EETS service for international tolling operation.

Benefit from Toll4Europe's many years of know-how in satellite-based road charging.

As a result of the smart design of our OBU that is fully accredited, we deliver highest and sustainable quality. Toll4Europe manages the complex European toll market via its EETS platform and third-party interfaces. As part of this, Toll4Europe concludes all necessary legal contracts with the toll chargers. Thus, as a sales partner, you will receive an all-inclusive package for your customers.

As a sales partner of Toll4Europe you can offer our EETS service to freight forwarders and transport companies under your own brand name. And with that, you can extend your range of valuable mobility and value-added services with journey details, tracking and tracing. In the future Toll4Europe proposes the possibility of embedding tolling and other service solutions directly integrated into the vehicle.

### SMARTER SERVICE, SIMPLEST HANDLING

- Our EETS platform is the central hub between numerous national authorities, toll chargers and you, our service partners.
- We ensure the technical, legal and organizational requirements of the EETS platform.
- As a sales partner, you gain access to the services of our tolling platform and receive the corresponding OBUs for your customers.
- We collect and manage all information relevant to billing that you need for uniform, correct accounting.

### In a nutshell:

We bundle European toll collection into a smart service for more mobility and simplicity. So you can concentrate on the essentials.

## THE EETS-SERVICE OF TOLL4EUROPE: BENEFITS FOR OUR SALES PARTNERS

- **High level of independence** – expand your product and service portfolio. Market the EETS offering from Toll4Europe directly as your own new service. As a sales partner, you can provide logistics providers and transport companies with the use of the EETS service as your own.
  - **Double benefit** – enable your customers to enter a world of simple, interoperable toll processing, independent of varying toll technologies but based on multiple years experience in GNSS tolling. You receive a commission dependent on generated toll volume for your service.
  - **Crystallisation point customer** – customer benefits lie at the heart of Toll4Europe. Toll4Europe links data, interfaces, invoice types and communication systems. And thus reduces the number of technical and organisational interfaces, lifting the burden for sales partners and toll chargers: with just one contact point and contract for one standardised invoice.
  - **Future proof** – the Toll4Europe EETS platform is easy to integrate and guarantees professional connection with secure data traffic for partners and effective management of interfaces between all parties. The platform meets the very latest standards and will be complemented by new standards on an ongoing basis.
  - **Added value: mobility and value-added services** – expand your offering with valuable value-added services, such as journey details, tracking and tracing, as well as mobility solutions integrated into the vehicle.
-
