

PAN-EUROPEAN TRUCK TOLLING IN ONE PLACE!

Expand your range of services and benefit from our many years of experience for reliable toll collection, with the interoperable offer from Toll4Europe's international service and toll operation.

The result: a cross-national On-Board Unit (OBU), secure data exchange, exact calculation of toll revenues and a trusted partnership with clear visibility. Toll4Europe manages complex platform connections and interfaces to third-party providers as well as the necessary legally binding contracts with the toll collectors. As a sales partner, you receive an all-round, care-free package for your customers.

In short: we are bundling European toll collection into a smart service for greater mobility and simplicity.

As a Toll4Europe distributor, you offer the use of the interoperable service to freight forwarders and transport companies under your own name.

This way you can provide your offer with valuable mobility and value-added services such as trip details or tracking and tracing, extending the possibility of integrated mobility solutions.

18 toll areas in one contract with complete billing from one source.

Pan-European OBU with flexibly bookable toll services at no extra cost.

Easy booking of new services via „over the air“ update.

Benefit from our 20 years of toll expertise: continue to grow with our smart services for greater mobility and simplicity.

Easy reuse of OBUs by changing OBUs from customer A to customer B – without return shipment or garage visit.

Free OBU delivery to customers in all EU countries.

Tracking & Tracing service replaces expensive fleet management solutions for all European countries.

Simple payment methods thanks to Post Payment – also in Hungary.

Reliable interoperability & accuracy of toll collection: technology-independent use of the OBU for all relevant DSRC standards and GNSS countries.
