Toll4Europe App: The future of tolling is mobile

Free additional service

As an additional service to our OBU, the Toll4Europe App is available free of charge in the PlayStore.

All at a glance

User-friendly view of all stored OBU data on the driver's smartphone: vehicle data, booked toll services, OBU settings and battery status.

Digital vehicle declaration

Always having the necessary vehicle declaration documents for Austria and Denmark at hand.

On the safe side

Through our secure authentication pairing method, the Toll4Europe App offers the highest security standards.

Support 24/7

All important information such as the OBU user manual, OBU installation videos and FAQs are available in the Toll4Europe App at any time.

Push message

After crossing a country border, the Toll4Europe App reminds the driver of necessary adjustments in the tachograph and on the OBU.

further

Taking you

What our Sales Partners benefit from:

Pan-European OBU with 17 toll services for vehicle fleets > 3.5 t
Covering most flexible and comprehensive data processing.

Operational excellence: IT & Service DNA

Best in class toll charging performance & accuracy. Over 20 years of expertise in IT, tolling & mobility services.

Choose one or all freely selectable services without extra charge

Easy booking of additional services “over the air”.

Professional logistic management

Including storage, refurbishment and EU-wide OBU shipment at no extra cost.

Standardized Sales Partner API

For easy partner integration and automated data processing.

Easy reuse of OBUs

Immediate transfer from one customer to another with unique time-savings.

Service & Complaint Management

Customer-centric and reliable deep dive analysis and backend support.

Simple settlement

Post-payment billing for all toll domains including Hungary.

What our users benefit from:

Clear view

Only one device in the windscreen.

Uncomplicated

Convenient and intuitive OBU operation in 22 languages.

Over-the-air

Technical updates and extensions to the (toll) service range quickly and immediately uploaded to the OBU.

Transparent fleet management options

Keep track thanks to intelligent tracking solutions.

Clarity

Daily and historical billing transactions at a glance.

Best in class performance

No system failures, reliable OBU device lead to few to no penalties.

Easy installation

Connect the device and some minutes later the OBU is ready to use.

On the safe side

Use of our OBU exchange service and get your OBU permanently installed to avoid possible power failures.

Mobile on the road

All vehicle information can be viewed and controlled via the Toll4Europe App.
